The Faster Payments Task Force calls upon all stakeholders to seize this historic opportunity to realize the vision for a payment system in the United States that is faster, ubiquitous, broadly inclusive, highly secure, and efficient, with all service providers enabling ubiquitous receipt for end-user customers by 2020.

### BACKGROUND

The Faster Payments Task Force was convened by the Federal Reserve in May 2015 to identify and evaluate alternative approaches for implementing safe, ubiquitous, faster payments capabilities in the United States. Participation in the Faster Payments Task Force was comprised of more than 300 diverse payments experts.

Consistent with their mission, the task force developed The U.S. Path to Faster Payments, inclusive of the following work products:

<table>
<thead>
<tr>
<th>Glossary of Terms</th>
<th>Set of relevant definitions that establishes a common lexicon for task force work products</th>
</tr>
</thead>
<tbody>
<tr>
<td>Effectiveness Criteria</td>
<td>A description of stakeholder needs that can be used to assess faster payments solutions and as a guide for innovation in the payments industry</td>
</tr>
<tr>
<td>Capability Showcase</td>
<td>Online forum where solution providers can showcase payment capabilities that can support end-to-end faster payments solutions</td>
</tr>
<tr>
<td>Solution Proposals and Qualified Independent Assessment</td>
<td>End-to-end faster payment solution proposals were submitted to be assessed against the Effectiveness Criteria by an independent, team of experts</td>
</tr>
<tr>
<td>Recommendations</td>
<td>Ten recommendations to achieving ubiquitous, faster payments in the United States by 2020</td>
</tr>
</tbody>
</table>

### FASTER PAYMENTS SOLUTION PROPOSALS

In early 2016, the task force solicited proposals for end-to-end faster payments solutions that could address the need for safe, ubiquitous, faster payments and established an external Qualified Independent Assessment Team (QIAT) to assess them against the Effectiveness Criteria. The proposal assessment process was designed to enhance potential market solutions, not to choose solutions. Additionally, the process facilitated diverse stakeholder input for the benefit of potential operators, end users of these systems, and the public at large. After receiving comments from the full task force, 16 solution proposers have released their proposals to the general public.

By highlighting the possibilities for realizing fulfillment of the task force’s Effectiveness Criteria, the proposals help illustrate the task force’s vision for a better payment system for the United States.

### TASK FORCE VISION

The Faster Payments Task Force believes the United States must leverage new technologies and new paradigms around speed, security, and efficiency to create a better payment system: one that is faster, ubiquitous, broadly inclusive, safe, highly secure, and efficient. This vision will be realized through collaboration among all stakeholders, including faster payments solution operators, payment service providers, end users, and others.

It will be a payment system in which competing solutions interoperate to meet the Effectiveness Criteria and deliver broad benefits to American consumers, businesses, and government agencies through enhanced security and fraud prevention, and seamless end-to-end payments.
To maintain the momentum to create a faster payments system, the task force recommends ongoing collaboration to develop a faster payments system in the United States that fulfills its vision, with work beginning in three key areas:

With this report, the task force issues a call to action to all payments stakeholders to:

- Embrace and promote the vision and the Effectiveness Criteria;
- Actively participate in the ongoing dialogue;
- Contribute to work group efforts and deliverables; and
- Take steps to make your own organization faster payments ready by 2020.
